

NEXT MEETING: Wednesday, August 14, 7:00PM.

The program for the meeting will be a **Wrap-up of the Summer Show**. The meeting as usual will be at the St. Stephens Methodist Church, 400 W. New Orleans, in BA.

Steve Walter's program on his approach to relief carving was interesting and entertaining. He showed and explained the different types of relief carving as shown here with the simplest (lower left) to the most complex (bottom right).

Woodworking Terms You May Not Be Familiar With:

BAND SAW:

A large stationary power saw primarily used by most shops to cut large pieces into smaller pieces that more easily fit into the trash after you cut on the inside of the line instead of the outside edge.

TWO-TON ENGINE HOIST:

A tool for testing the maximum tensile strength of all the crap you forgot to disconnect.

PHILLIPS SCREWDRIVER:

Normally used to stab the vacuum seals under lids or for opening old-style paper-and-tin oil cans and splashing oil on your shirt; but can also be used, as the name implies, to strip out Phillips screw heads.

STRAIGHT SCREWDRIVER:

A tool for opening paint cans. Sometimes used to convert common slotted screws into non-removable screws and butchering your palms.

PRY BAR:

A tool used to crumple the metal surrounding that clip or bracket you needed to remove in order to replace a 50 cent part.

PVC PIPE CUTTER:

A tool used to make plastic pipe too short.

HAMMER:

Originally employed as a weapon of war, the hammer nowadays is used as a kind of divining rod to locate the most expensive parts adjacent to the object we are trying to hit.

More to come in next newsletter. Thanks to Bill Payne

Thanks to Flexcut for donating these tools to be raffled off at the Summer Show, August 9-10. Be there and take your chances on one of these three items!
